

Same contours do not determine the same material correspondence

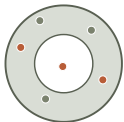

a Acquisition information

Routine cine
Anatomy + image cues

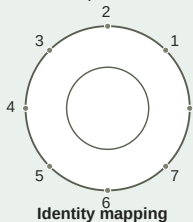

Tagging
Prepared magnetisation pattern

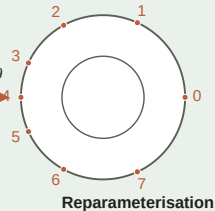

DENSE
Displacement encoded in MR phase

b Same mask, different material spacing

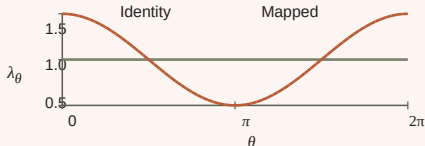

$$\theta' = \theta + a \sin \theta$$
$$a = 0.5$$

c Overlap $\neq$ correspondence

Dice = 1
Hausdorff distance = 0

$$\lambda_\theta = 1 + a \cos \theta$$
$$r' = r; \min \lambda_\theta = 0.5 > 0$$

All panels are original deterministic schematics. They contain no patient image, measured displacement, or published quantitative trace.
