a Four spatial failures, one RMSE (0.17)

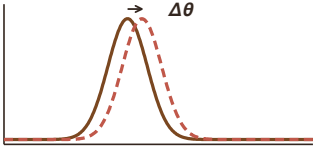

reference — estimate

Magnitude

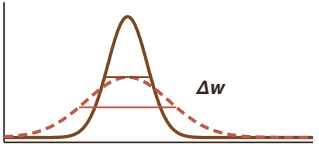

peak 1.00 → 0.50
RMSE 0.17

Location

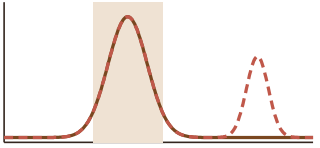

centroid +0.05 of the wall
RMSE 0.17

Extent

FWHM 0.15 → 0.32
RMSE 0.17

Support

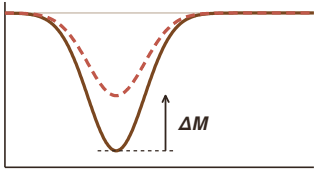

extra peak 0.67 off the support
RMSE 0.17

position around the wall →

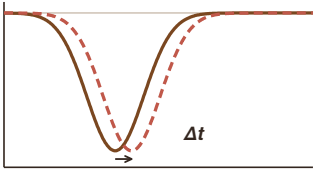

b Temporal: same RMSE (0.16)

Magnitude

peak −1.00 → −0.60
RMSE 0.16

Timing

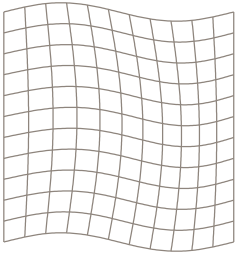

peak time +0.05 cycle
RMSE 0.16

time →

A single mean-squared error cannot say which attribute failed; report bias, location, extent and timing error separately.

c Invertible is necessary, not sufficient

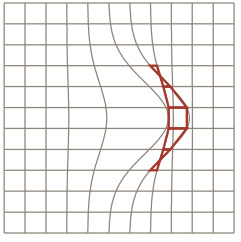

Invertible

min det J	**0.81**
cells det J ≤ 0	**0 / 121**

can still be wrong

Folded

min det J	**−1.13**
cells det J ≤ 0	**5 / 121**

orientation reversed
